

Product UI/UX

Godrej-Storyteller is an interactive 360 degree visualisation platform that has brought about a revolution in the real estate industry by allowing tech-savvy customers to undertake digital tours of different townships and properties.

Client Name

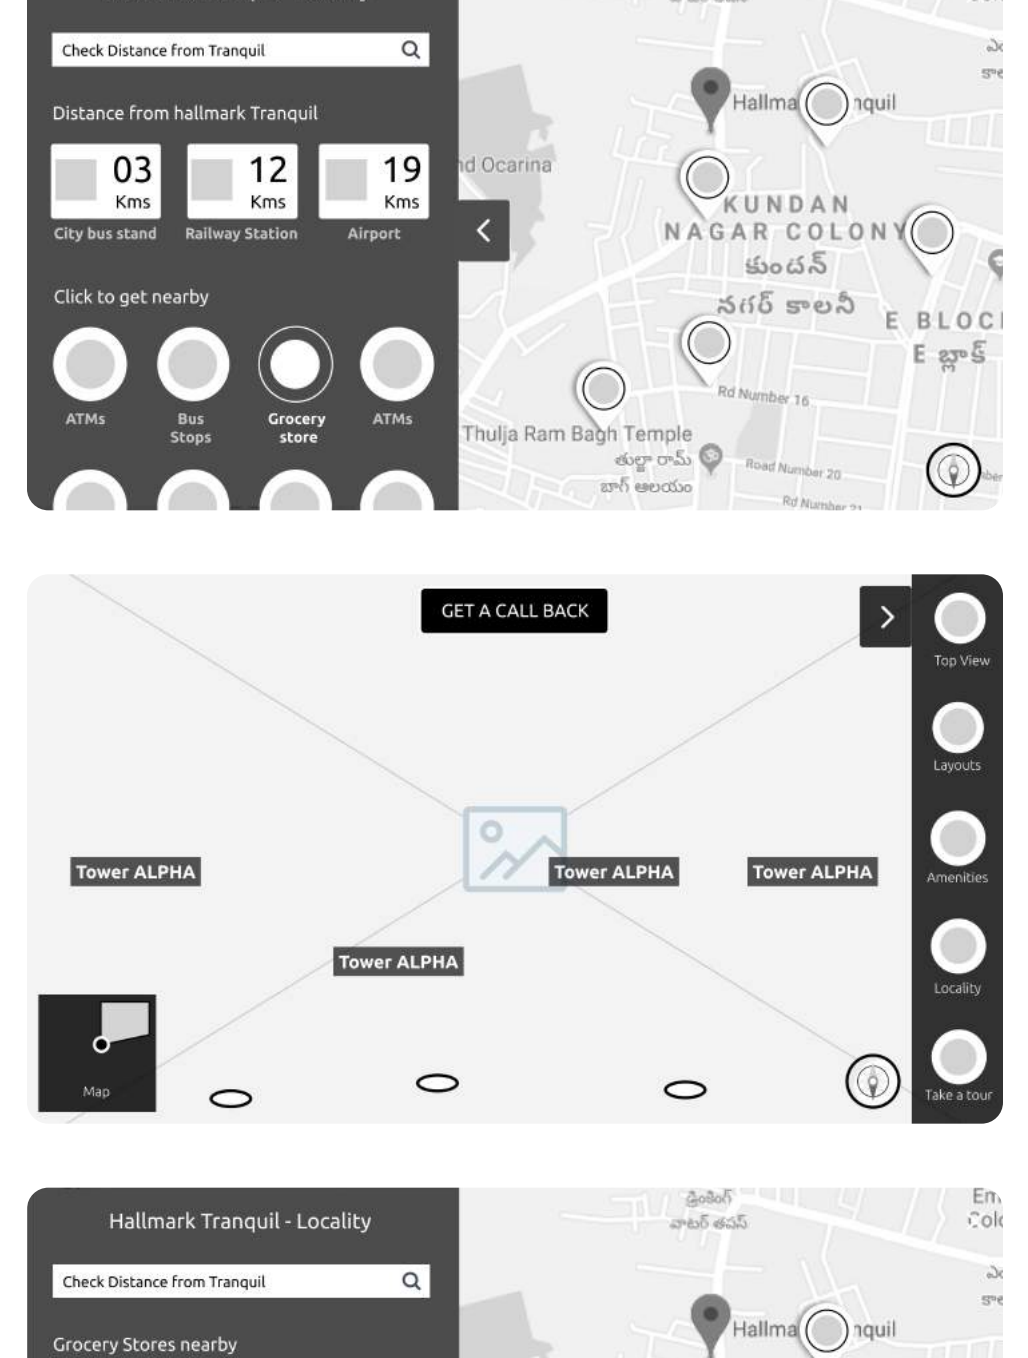

Godrej

Project Duration

8 Months

Estimated Time

2000+ Hours

The Challenge

The existing software and websites had a high learning curve, making it difficult for first time users to navigate

A monotone colour palette was to be used so that it could be cohesive across the other products from the client

A tool with smart gestures, interactions at macro and micro level to create a great user experience

There's no platform that would provide a real time interactive 3D tour to the prospect buyers even before the property is built

Problem

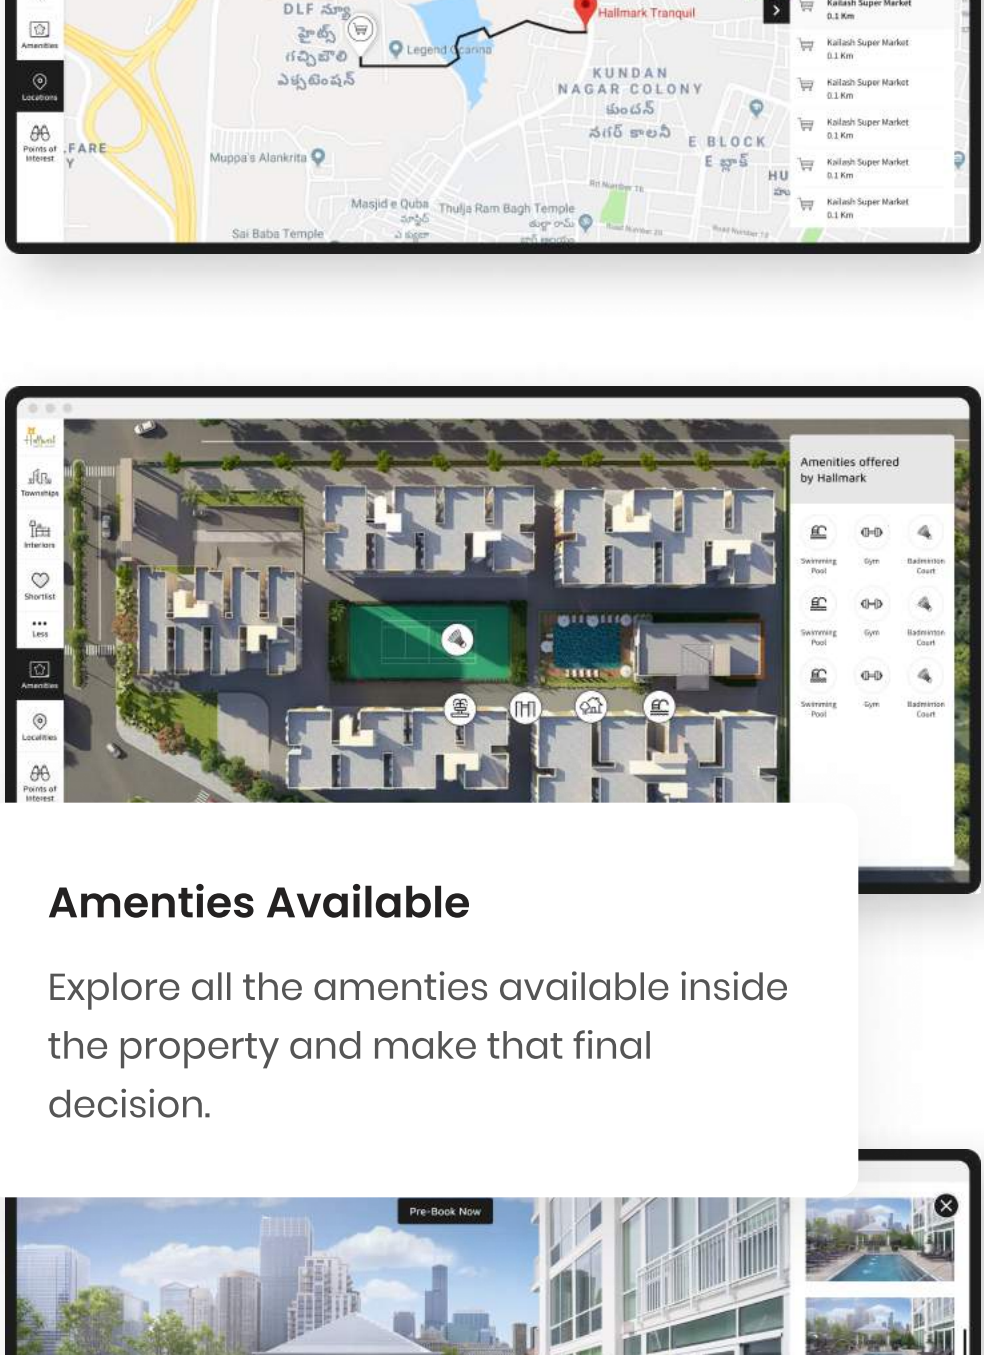

In a fast-paced world like ours, the global real estate industry cannot just rely on traditional methods of showcasing properties. Storyteller brings about the much needed revolution in the real estate market by providing a digitally comprehensive experience of property visitation and visualisation to the buyers and lead generation to the real estate developers.

Goal

The goal was to build a dynamic experience with multiple ways to obtain intelligent 3D visuals of the property. The experience was targeted to be so wholesome that it would replicate the feel of what the space actually looks like.

01

Ideation

USP's

Interactive 3D walkthrough

Quality lead generation

Hassle-free showcase of the property

Easy to explore for all users

Revolutionary in approach

02

User Interface

Putting the monochromatic colours in use for a fresh and clean UI

Typography

Modern sans-serif typefaces were used for a contemporary design outlook

Iconography

Icon system is built in such a way that it allows for a cohesive set of detailed icons

Storyteller is the immersive 3D interactive platform

It allows the buyers to digitally visit and view the projects of their liking.

Select and View

Select your desired typology, tower and floor and then explore the layouts available within them.

Filter Properties

The robust experience allows for precise filtering so that you view only those properties that you are interested in.

Explore Township

Explore various townships that are available and narrow down your options accordingly.

Checkout Interiors

Select the property that you are interested in. Check the floor plan, visit every room, view the interiors. It couldn't get easier than this!

Localities

No more worrying about the localities close to your property. Know all the bus stops, supermarkets etc. nearby

Amenties Available

Explore all the amenties available inside the property and make that final decision.

Shortlist interested layouts

Liked a layout but want to explore more? Shortlist all your favourite layouts and keep on exploring. You might find something better!

Points of Interest

Get to know all the available nearby places of interest like restaurants, parks, theatres and much more
